

Special Issue on Environmental Remediation, Analysis and Technology

Call for Papers

Environmental remediation refers to the adoption of physical, chemical, and biological technical measures on the polluted environment to reduce the concentration or toxicity of pollutants in the environment or completely harmless. It includes the removal of pollutants such as soil, surface water, groundwater, sediments, etc. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Environmental Remediation, Analysis and Technology**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Environmental Remediation, Analysis and Technology**. Potential topics include, but are not limited to:

- Soil remediation
- Groundwater remediation
- Remediation materials and technology
- Bioremediation
- Solid waste environmental remediation
- Design, analysis and application of remediation
- Environmental pollution and remediation
- Remediation standards

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Environmental Remediation, Analysis and Technology**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	August 22nd, 2021
Publication Date	October 2021
