**Special Issue on**  
**Environment, Sustainability and Resilience**  
**Call for Papers**

Environment, Sustainability and Resilience is a prime environmental concern that threatens plant, animal, and human health, as well as the quality of the environment. Unlike organic pollutants, heavy metals once introduced into the environment cannot be biodegraded. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Environment, Sustainability and Resilience.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Environment, Sustainability and Resilience**. Potential topics include, but are not limited to:

- Biological diversity
- Climate resilience and sustainability
- Conservation biology
- Deforestation
- Dumping of waste into the sea
- Ecological restoration
- Environmental change
- Environmental policy
- Environmental resilience and transformation
- Eutrophication and algal blooms
- Human impacts
- Overfishing
- Waste and resource use

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Environment, Sustainability and Resilience**” should be selected during your submission.

Special Issue Timetable:

---

Submission Deadline	January 18th, 2024
Publication Date	March 2024
