

Special Issue on Environmental Degradation, and Causes, Effects and Solutions

Call for Papers

Environmental degradation is the deterioration of the environment through consumption or depletion of resources including air, water and soil; the destruction of ecosystems and habitat; the extinction of wildlife; and various kind of pollution. It is the reduction of the capacity of the environment to meet social and ecological objectives and needs. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Environmental Degradation.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Environmental Degradation, and Causes, Effects and Solutions**. Potential topics include, but are not limited to:

- Biodiversity loss
- Deforestation
- Desertification
- Habitat destruction
- Land degradation
- Mass extinction event
- Ozone layer depletion
- Remedial activities
- Soil erosion
- Water scarcity

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Environmental Degradation, and Causes, Effects and Solutions**” should be selected during your submission.

Special Issue Timetable:
