

Special Issue on Geo-information Science and Technology

Call for Papers

Geographic information science is a science that studies the collection, analysis, storage, display, management, dissemination and application of geographic information, and the law of the generation, transmission and transformation of geographic information streams. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Geo-information Science and Technology**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Geo-information Science and Technology**. Potential topics include, but are not limited to:

- Design, implementation and use of geographical information
- Geographical information systems (GIS)
- Geo-spatial information science
- Spatial modeling and reasoning
- GIS and cloud computing
- Engineering surveying
- Geographical analysis for urban and regional development
- GIS, RS and other spatial information technologies
- Applications of GIScience

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Geo-information Science and Technology**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	March 20th, 2021
Publication Date	May 2021
