Editor-in-Chief

Prof. Christian Corda

Section of Physics of Santa Rita School of Advanced
Academic Studies and Research, Italy

Editorial Board

Prof. Mohamed Assaad Abdel-Raouf

Physics Department, Faculty of Science, Ain Shams University, Egypt
Fukushima University, Japan

Dr. Kazuharu Bamba

Dr. Andrew Beckwith

Department of physics, PRC (visiting scholar) Chongqing University,
USA

Prof. Elmo Benedetto

Department of Computer Science, University of Salerno, Italy

Dr. Alexander Burinskii

Laboratory of Theoretical Physics in Nuclear Safety Institute of the
Russian Academy of Sciences, Russia

Prof. Farhad Darabi

Azarbaijan Shahid Madani University, Iran

Dr. Luca Fabbri

University of Bologna, Italy

Dr. Maria Emília Xavier Guimarães

Instituto de Física, Universidade Federal Fluminense, Brazil

Dr. Seyed Hossein Hendi

Shiraz University, Iran

Dr. Huda E. Khalid

Mosul University, Iraq

Prof. Maria Paola Lombardo

Istituto Nazionale di Fisica Nucleare, Italy

Dr. Lino Miramonti

Università degli Studi di Milano, Italy

Dr. Hooman Moradpour

Research Institute for Astronomy and Astrophysics of Maragha
(RIAAM), Iran

Prof. Jean Perron

Department of Applied Sciences (DSA) University of Québec in
Chicoutimi, Canada

Prof. Christopher Pilot

Gonzaga University, Spokane, WA, USA

Prof. Waldyr A. Rodrigues Jr.

Institute of Mathematics, Statistics and Scientific Computation State
University of Campinas (UNICAMP), Brazil

Prof. Matteo Luca Ruggiero

DISAT, Polytechnic University of Turin, Italy

Prof. Jafar Sadeghi

University of Mazandaran, Iran

Dr. Burra Gautam Sidharth

International Institute of Applicable Mathemaics & Information
Sciences B.M. Birla Science Centre, India

Dr. Anirvan Sircar

Intel Corporation, USA

Dr. Lorenzo Zaninetti

Department of Physics, Italy

Table of Contents

Volume 10 Number 1

January 2024

Stringy Phenomenology with Preon Models

R. Raitio 1

Classical Cosmology I. Anomalous Redshift for Galaxies in NED-D

L. Zaninetti 8

A More Accurate Determination of the Magnitude of Cosmic Inflation in the Big Bang Model

S. Spremo 27

Earth: Review Article

V. S. Netchitailo 31

A Model for a Dual Universe

T. M. El-Sherbini 52

Gravitational Waves Background, as Well as Some UFO, FRB and Supernova Flares, Are Due to Compressibility of the Spacetime (CoST)

E. A. Novikov 67

The Structure of Gravity Funnels and Stability Considerations of Matter in SI Units

T. Bartusch 71

Elementary Fermions: Strings, Planck Constant, Preons and Hypergluons

D. Kwiat 82

A Theoretical Analysis of the Acceleration and the Angular Momentum of the Universe

A. Irani 101

Hubble Tension Explanation from This Cosmological Model $\Lambda\Lambda\Omega$ (Slow Bang Model, SB)

J. Perron 106

Generalized Newton's Theory of Universal Gravitation and Black Holes

L. Aghalovyan 126

How Torsion as Presented by De Sabbata and Sivaram in Erice 1990 Argument as Modified May Permit Cosmological Constant, and Baseline as to Dark Energy

A. W. Beckwith 138

The Formation of Oscillation Patterns Based on the Planetary Gravitational Field and Their Suitability for Earthquake Prediction

M. E. Nitsche..... 149

Induction System for a Fusion Reactor: Quantum Mechanics Chained up

F. B. Grimm 158

Curved Space-Time at the Planck Scale

L. Nash..... 167

Gedankenexperiment for Modified ZPE and Planck’s “Constant”, h , in the Beginning of Cosmological Expansion, Partly Due to NLED

A. W. Beckwith..... 180

Unified Description of the Three Stable Particles in Self-Action Allows Determination of Their Relative Masses

Y. G. Halfon 185

Solving the Three-Neutrino Problem as One of the Three-Body Problems in Physics

Z. B. Todorovic..... 197

Quantum Chromodynamics on Lattice: Direct Minimization of QCD-QED-Action with New Results

J. Helm..... 228

The Origin of Cosmic Structures Part 6: CMB Anisotropy

J. C. Botke..... 257

Visualizing the Spin & Radiation of the Extended Electron in Magnetic Field

H. V. Nguyen..... 277

New Approach to Synchronize General Relativity and Quantum Mechanics with Constant “ K ”-Resulting Dark Matter as a New Fundamental Force Particle

S. P. Kodukula 292

The Circular Current Loop as a Model of Fundamental Particles

G. Landvogt..... 303

The Pionic Deuterium and the Pion Tetrahedron Vacuum Polarization

R. Rom..... 329

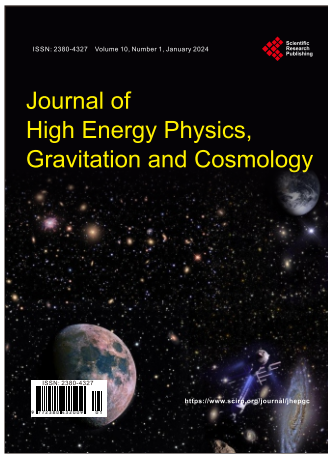

A New Perspective on Time and Gravity

I. Roopkom, W. Jongchanachavawat, C. Prattanaruk, K. Nanan, P. Wisartpong, T. Mayteevarunyoo,
P. Wardkein 346

On a Heuristic Viewpoint Concerning the Conversion and Transformation of Sound into Light

A. Rizzo 363

Call for Papers

Journal of High Energy Physics, Gravitation and Cosmology

ISSN Print: 2380-4327 ISSN Online: 2380-4335
<https://www.scirp.org/journal/jhepgc>

Journal of High Energy Physics, Gravitation and Cosmology (JHEPGC) is a cutting edge research periodical aimed to be forward looking and innovative and, at the same time, remaining in the mainstream. In other words, we are all in favor of being open minded about alternatives to mainstream, but they must be properly formulated and plausible scientific proposals, supported by mathematical rigor. In fact, being open mind in Science is a good thing and we encourage mainstream as well as avant-garde research papers but they must be grounded in real science and of course meet with our refereeing standards.

The need for such a journal has become more than apparent when recent cosmological observation and measurement has made it clear that new discoveries (particularly the discovery of Dark Energy), the accelerated cosmic expansion and gravitational waves have shaken the very foundation of High Energy Physics, Gravitation and Cosmology. Thus we, on the one hand, need to be truly open minded, i.e. in the sense clarified above. On the other hand, we have to adhere as much as possible to our time tested theories and be guided even more than before by observations and experiments.

The Journal is intended to fulfill this double edge philosophy religiously. It goes without saying that the refereeing of submitted papers will be also both rigorous and swift. Following what we have said, the Journal will predictably cover, but will not be restricted only to, the following subjects:

Subject Coverage

- Accelerated Cosmic Expansion
- Advances in Mathematical Methods
- Astronomy and Astrophysics
- Black Holes
- Cosmic Quantum Entanglement
- Cosmic-Ray Physics
- Dark Energy
- Dark Matter
- Dimensional Regularization
- Extended Theories of Gravity
- Fractal Models of Space Time
- Gravitational Waves
- K-Theory
- Loop Quantum Gravity
- M-Theory
- N-Category Theory Applied to Physics and Cosmology
- Non-Commutative Geometry
- Non-Demolition Quantum Measurement
- Observational Techniques
- Phenomenological Oriented Theories of Particles and Field String Theories
- Quantum Field Theories in Curved Space Time
- Quantum Teleportation
- Renormalization
- Scale Relativity
- Theoretical and Experimental High Energy Physics
- Topological Defects
- Unification of Fundamental Interactions
- Varying Speed of Light
