

Special Issue on
Actuarial Science and Quantitative Finance

Call for Papers

Actuarial science is refers to a discipline that assesses financial risk in the insurance and finance fields using mathematical and statistical methods. It applies the mathematics of probability and statistics to define, analyze and solve the financial implications of uncertain future events. Such as property/casualty, pensions, life insurance, health insurance, statistics, economics, business, and finance.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **actuarial science and quantitative finance**. Potential topics include, but are not limited to:

- Portfolio management
- Asset management
- Derivative valuation
- Risk theory
- Economics of insurance
- Econometric analysis and modeling
- Applications

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Actuarial Science and Quantitative Finance**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	November 24th, 2016
Publication Date	January 2017
