

Special Issue on Research on Real Business Cycle Theory

Call for Papers

According to the real business cycle theory, the market mechanism is perfect and the cyclical fluctuation is rooted in the supply. It also denies the view that the macro economy is divided into long and short term. This theory is rich in theoretical origin and obvious realistic background. It is also of great practical significance for China in the process of economic transition and rapid development.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **research on real business cycle theory**. Potential topics include, but are not limited to:

- Basic theoretical model
- Evolution, significance and function of theory
- Application and development of theory
- Cause analysis of economic cycle fluctuation
- Regulation and control of economic cycle fluctuation
- Relationship between monetary policy and economic cycle
- Applicability of theory to Chinese economy
- Defects in theory

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Research on Real Business Cycle Theory**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	May 9th, 2017
Publication Date	August 2017
