

Special Issue on Stock Valuation

Call for Papers

Stock valuation is the method to calculate the theoretical value of company and its stocks. The method is mainly used to predict future market price, or more generally, the potential market price. Stock valuation is a relatively complicated process which impacted by many factors and has no uniform worldwide standard. Through Stock valuation, investors can discover and buy the stocks that are seriously undervalued, and thus to profit from price movement. It also helps investors understand the comments on stocks, and analyze the risks and profitability of the stocks.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **stock valuation**. Potential topics include, but are not limited to:

- Stock valuation model
- Stock valuation methods
- Application of stock valuation
- The empirical analysis of stock valuation
- Stock valuation system
- Impact on stock valuation

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Stock Valuation**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	December 28th, 2017
Publication Date	February 2018
