

Special Issue on Financial Statistics

Call for Papers

Financial statistics refers to the activities of the statistical department of financial institutions to collect, sort out and analyze the information of various financial business activities. Financial statistics can be further divided into categories of bank credit statistics, bank cash income and expenditure statistics, currency supply and circulation statistics, and financial market statistics. Although financial statistics has made a great contribution to the promotion of financial development, it is also facing a series of potential challenges. Financial statistics is also developing towards a comprehensive and diversified statistical system engineering. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Financial Statistics**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Financial Statistics**. Potential topics include, but are not limited to:

- Statistical analysis of banking performance
- Statistical modelling in finance
- Financial market statistics and data analysis
- International financial statistics
- Methods for statistical data analysis
- Credit income and expenditure statistics
- Financial and operating statistics

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Financial Statistics**” should be selected during your submission.
