Table of Contents

Volume 6  Number 8  July 2015

Real Magnetic Poles (Magnetic Charges) in the Physics of Magnetism, Gravitation and Levitation
R. A. Sizov ........................................................................................................................................................................... 1013

Photon Structure Function Revisited
C. Berger ........................................................................................................................................................................... 1023

Linac Beam Dynamics Code Benchmarking
X. J. Yin, W. Bayer, A. Franchi ........................................................................................................................................... 1044

Boltzmann or Gibbs Entropy? Thermostatistics of Two Models with Few Particles
E. N. Miranda ........................................................................................................................................................................ 1051

Study on the Physical Basis of Wave-Particle Duality: Modelling the Vacuum as a Continuous Mechanical Medium
D. C. Chang, Y.-K. Lee ......................................................................................................................................................... 1058

Optical Properties of Silver Nanoparticles for Surface Plasmon Resonance (SPR)-Based Biosensor Applications
L. Mahmudin, E. Suharyadi, A. B. S. Utomo, K. Abraha ..................................................................................................... 1071

Bounds on the Number of Light Neutrinos Species, $g_1'$ Coupling and $Z - Z'$ Mixing Angle in a $U(1)_{B-L}$ Model
A. González-Sánchez, A. Gutiérrez-Rodríguez, M. A. Hernández-Ruíz .............................................................................. 1077

Creation of a Non-Expanding, Non-Singular Universe
W. Petry ............................................................................................................................................................................ 1085

Global Solar Variations and Effects of Relativistic 2D-Hydrogen
G. Dreschhoff, H. Jungner, K. W. Wong, C. A. Perry ....................................................................................................... 1095

Spherical Casimir Effect for a Massive Scalar Field on the Three Dimensional Ball
A. Erdas ................................................................................................................................................................................ 1104
Fibre-Reinforced Generalized Thermoelastic Medium Subjected to Gravity Field

F. S. Bayones, N. S. Hussien…………………………………………………………………………………………………………………………………1113

Gravitational Forces Explained as the Result of Anisotropic Energy Exchange between Baryonic Matter and Quantum Vacuum

S. L. Hahn…………………………………………………………………………………………………………………………………………………………1135

Temperature and Concentration under Boundedness

M. K. Koleva…………………………………………………………………………………………………………………………………………………………1149

Theoretical Study of the Triplet Electronic States of the BP Molecule

M. Mansour, N. El-Kork, M. Korek………………………………………………………………………………………………………………………1156

Gap Mesh Wire Control on Nano-Particles Growth

A. R. Galaly…………………………………………………………………………………………………………………………………………………………1162

Theoretical Calculation of the Low-Lying Electronic States of the Molecule PbO

D. Kaeen, M. Korek, S. N. Abdulal, R. Awad…………………………………………………………………………………………………………1171
Journal of Modern Physics (JMP)

DISCLAIMER OF LIABILITY

Statements and opinions expressed in the articles and communications are those of the individual contributors and not the statements and opinion of Scientific Research Publishing, Inc. We assume no responsibility or liability for any damage or injury to persons or property arising out of the use of any materials, instructions, methods or ideas contained herein. We expressly disclaim any implied warranties of merchantability or fitness for a particular purpose. If expert assistance is required, the services of a competent professional person should be sought.

PRODUCTION INFORMATION

For manuscripts that have been accepted for publication, please contact:
E-mail: jmp@scirp.org
Journal of Modern Physics (JMP) is an international journal dedicated to the latest advancement of modern physics. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas of modern physics.

Editor-in-Chief
Prof. Yang-Hui He
City University, UK

Executive Editor-in-Chief
Prof. Marko Markov
Research International, Buffalo Office, USA

Subject Coverage
Journal of Modern Physics publishes original papers including but not limited to the following fields:

- Biophysics and Medical Physics
- Complex Systems Physics
- Computational Physics
- Condensed Matter Physics
- Cosmology and Early Universe
- Earth and Planetary Sciences
- General Relativity
- High Energy Astrophysics
- High Energy/Accelerator Physics
- Instrumentation and Measurement
- Interdisciplinary Physics
- Materials Sciences and Technology
- Mathematical Physics
- Mechanical Response of Solids and Structures
- New Materials: Micro and Nano-Mechanics and Homogenization
- Non-Equilibrium Thermodynamics and Statistical Mechanics
- Nuclear Science and Engineering
- Optics
- Physics of Nanostructures
- Plasma Physics
- Quantum Mechanical Developments
- Quantum Theory
- Relativistic Astrophysics
- String Theory
- Superconducting Physics
- Theoretical High Energy Physics
- Thermology

We are also interested in: 1) Short Reports—2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book Reviews—Comments and critiques.

Notes for Intending Authors
Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.

Website and E-Mail

What is SCIRP?
Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science with its publication.

What is Open Access?
All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, worldwide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
