

Special Issue on Agile Software Development

Call for Papers

Agile software development takes user's requirement evolution as the core, and adopts iterative and step-by-step method for software development. It advocates adaptive planning, evolutionary development, and continuous improvement, and it encourages rapid and flexible response to change.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **Agile Software Development**. Potential topics include, but are not limited to:

- Extreme programming
- Dynamic systems development method
- Agile modeling
- Large-scale, offshore and distributed
- Iterative, incremental and evolutionary
- Agile software development pitfalls
- Agile management

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Agile Software Development**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	November 28th, 2017
Publication Date	January 2018
