

## Special Issue on Surface and Interface of Materials

### Call for Papers

**Surfaces and Interfaces** play an essential role in virtually all materials and devices. They are widely recognized as key elements in materials process of primary important in the health, energy, electronics, and environmental sectors. With the decrease in size and increase in complexity of materials this already highly interdisciplinary field is now becoming ever more integrated. This special issue will be focused on studying surfaces and interfaces of materials and their applications.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **surface and interface of materials**. Potential topics include, but are not limited to:

- Techniques for surface and interface characterization
- Role of surfaces and interfaces in catalysis
- Friction at surfaces
- Process for synthesis of catalytic materials (Plasma-based processes, Physical vapor deposition, etc.)
- Dynamics at surfaces and interfaces of materials
- Application of surface and interface of materials (Medicine, Biotechnology, Chemistry, etc.)
- Analysis of surface and interface

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Surface and Interface of Materials**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	October 30th, 2014
Publication Date	December 2014

**Guest Editor:**

**Scientific Research**  
*Open Access*

**Journal of Surface Engineered  
Materials and Advanced Technology**

**ISSN Online: 2161-489X**
