

Special Issue on Management Science and Applications

Call for Papers

Management is the science of systematically studying the basic laws and general methods of management activities. Its purpose is to study how to improve the level of productivity through rational organization and allocation of human, financial, and material factors under the existing conditions. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Management Science and Applications**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Management Science and Applications**. Potential topics include, but are not limited to:

- Business strategy
- Finance and risk management, revenue management
- Operations management
- Optimization and modeling
- Product development and management
- Scheduling and control
- Transportation
- Information management and technology
- Human resource management
- Entrepreneurship
- Change and innovation management
- Management practice and theory

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Management Science and Applications**” should be selected during your submission.
