

## Special Issue on Highway and Transportation Research

### Call for Papers

Highway and Transportation Research focuses on the design, construction and maintenance of transportation infrastructure, as well as the management of transportation systems and services. It draws upon expertise from engineering, urban planning, economics, public policy, and other related disciplines to address the challenges facing transportation systems and services both locally and globally. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Highway and Transportation.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Highway and Transportation Research**. Potential topics include, but are not limited to:

- Freight transportation
- Highway capacity and demand analysis
- Highway drainage and erosion control
- Highway maintenance and management
- Intelligent transportation systems
- Land use planning
- Network modeling
- Pavement design and maintenance
- Public transportation
- Road design and construction
- Roadside design and operations
- Traffic control and management
- Traffic flow and operations
- Traffic management
- Transportation economics
- Transportation engineering
- Transportation infrastructure
- Transportation policy
- Vehicle technology

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Highway and Transportation Research**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	April 25th, 2024
Publication Date	June 2024

**Guest Editor:**
