## Subject Coverage

This journal invites original research and review papers that address the following issues in water resource and protection. Topics of interest include, but are not limited to:

- Agricultural Water Management
- Aquatic Conservation: Marine and Freshwater Ecosystems
- Ecology and Management of Inland Waters
- Economic, Sociological, and Environmental Considerations of Water Resources
- Ground Water Monitoring & Remediation
- Innovative Technologies and Engineering Solutions for Water Resources Protection
- Mine Water and the Environment
- Monitoring, Modeling and Prediction of Water Pollution
- Sea Water Utilization
- Surface and Ground Water Systems and Water Pollution Control
- Urban Water
- Water, Air & Soil Pollution
- Water and Environment
- Water Chemistry and Technology
- Water History
- Water Policy
- Water Purification and Wastewater Treatment
- Water Quality Assessment
- Water Quality and Ecosystems Modeling
- Water Quality, Exposure and Health
- Water Research & Education
- Water Resources and Climatic Change
- Water Resources Management
- Water Resources Protection and Sustainable Use
- Water Resources Restoration and Management
- Water Science and Technology

We are also interested in short papers (letters) that clearly address a specific problem, and short survey or position papers that sketch the results or problems on a specific topic. Authors of selected short papers would be invited to write a regular paper on the same topic for future issues of the **JWARP**.

## Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.

## What is SCIRP?

Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science, by delivering superior scientific publications and scientific information solution provider that enable advancement in scientific research.

## What is Open Access?

All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, world-wide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
