

## Special Issue on Water Pollution and Control

### Call for Papers

Water pollution is the contamination of natural water bodies by chemical, physical, radioactive or pathogenic microbial substances. Water pollution affects plants and organisms living in these bodies of water. In almost all cases the effect is damaging not only to individual species and populations, but also to the natural biological communities. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **water pollution and control**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **water pollution and control**. In this special issue, potential topics include, but are not limited to:

- Point-source pollution
- Radioactive substances
- Chemical water pollutants
- Physical water pollutants
- Groundwater pollution
- Water pollutant sources
- Water pollution control
- Sewage treatment

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly note that the “**Special Issue**” under your manuscript title should be specified and the research field “**Special Issue - Water Pollution and Control**” should be selected during your submission.

Also please note the following timetable:

Submission Deadline	April 15th, 2015
Publication Date	June 2015
