

Special Issue on Sustainable Water Management

Call for Papers

Water resource management is the activity of planning, developing, distributing and managing the optimum use of water resources. The world's water problems stem from our failure to meet basic human needs, ineffective or inappropriate institutions and management, and our inability to balance human needs with the needs of the natural world. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **sustainable water management**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **sustainable water management**. In this special issue, potential topics include, but are not limited to:

- Managing water in urban settings
- Sustainable water infrastructure
- Sustainable water sector systems
- Sustainable water policy
- Water demand prediction
- Water conservation

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Sustainable Water Management**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	June 18th, 2015
Publication Date	August 2015
