

Special Issue on Water Policy and Sustainability Research

Call for Papers

Water policy is to treat water as economic good which the ministry claims to promote its conservation and efficient use. Water resources management controls *water resources systems*, that are combinations of constructed water control facilities and natural, or environmental elements that work together to achieve water management. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of water policy and sustainability research.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **water policy and sustainability research**. In this special issue, potential topics include, but are not limited to

- Water right
- Water relations
- Water administrative management
- Dispute on water right
- The international water law
- Water project management
- Water resources systems
- Water resources sustainable developments

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - - Water Policy and Sustainability Research**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	February 18th, 2016
Publication Date	April 2016
