

Special Issue on Urban Water Systems and Challenges

Call for Papers

Safe and reliable models of urban water systems for the operation and management of such systems are of increasing importance in both developed and developing countries. The systems are becoming more and more complex, and there is growing need to treat them in an integrated manner. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of urban water systems and challenges.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **urban water systems and challenges**. In this special issue, potential topics include, but are not limited to:

- Water distribution network design and operation
- Leakage control
- Potable water demand management
- Asset management
- Wastewater collection networks
- Storm water drainage systems
- Urban flood management
- Design and implementation of flow surveys

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly note that the “**Special Issue**” under your manuscript title should be specified and the research field “**Special Issue - Urban Water Systems and Challenges**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	March 15th, 2017
Publication Date	May 2017
