

## Special Issue on Water Treatment Engineering

### Call for Papers

Clean, safe water is vital for everyday life. Water is essential for health, hygiene and the productivity of our community. The water treatment process may vary slightly at different locations, depending on the technology of the plant and the water it needs to process, but the basic principles are largely the same. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of water treatment engineering.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **water treatment engineering**. In this special issue, potential topics include, but are not limited to:

- Wastewater treatment
- Nanotechnology
- Photocatalysis
- Adsorption
- Circulating water system
- Sea water desalination
- Industrial softened water

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly note that the “**Special Issue**” under your manuscript title should be specified and the research field “**Special Issue - Water Treatment Engineering**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	April 26th, 2017
Publication Date	June 2017
