

Special Issue on Water Conservancy Project

Call for Papers

Water conservancy engineering is used to control and allocate the nature of surface water and groundwater, built for the purpose of the elimination of its irrigation project. Only to build water conservancy project can we control water flow, prevent floods, the amount of water regulation and distribution. Water conservancy project, one of fundamental infrastructures in a country, brings many ecological environment issues while it produces remarkable social and economic benefits. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of water conservancy project.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **water conservancy project**. Potential topics include, but are not limited to:

- Hydroelectricity
- Water power
- Waterlogging
- Water distribution
- Flood control
- Water storage project

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Water Conservancy Project**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	April 11th, 2017
Publication Date	June 2017
