
Special Issue on Water, Environment and Human

Call for Papers

Water is one of the most common substances on the earth and an important resource for human life. Water environment refers to the environment in which water is formed, distributed and transformed in nature. The pollution and destruction of water environment has become one of the main environmental problems in the world. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Water, Environment and Human**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Water, Environment and Human**. Potential topics include, but are not limited to:

- Water pollution and human health
- Water and sustainable development
- Wastewater treatment and Reuse
- Water pollution and control
- Groundwater and environment
- Hydrological disasters
- Water resource and protection
- Human activity and water environment

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Water, Environment and Human**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	May 30th, 2020
Publication Date	July 2020
