

Special Issue on
Groundwater Management and Sustainability
Call for Papers

Groundwater is water that has infiltrated the ground to occupy all or part of the void spaces in soils or geologic strata. It is fed by precipitation and can resurface to replenish streams, rivers, and lakes. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Groundwater Management and Sustainability.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Groundwater Management and Sustainability**. Potential topics include, but are not limited to:

- Aquifers and wells
- Groundwater contamination
- Groundwater depletion
- Groundwater exploration
- Groundwater flow and transport
- Groundwater irrigation use
- Groundwater model
- Groundwater quality
- Saline aquifer
- Springs and seeps
- Water cycle

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Groundwater Management and Sustainability**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	December 31st, 2021
---------------------	---------------------

Scientific Research
Open Access

**Journal of Water Resource
and Protection**

ISSN Online: 1945-3108

Publication Date

February 2022
