

Special Issue on Fiber Reinforced Materials

Call for Papers

Fiber reinforced material is a composite material made of a polymer matrix reinforced with fibers. They are composites used in almost every type of advanced engineering structure, chemical processing equipment and civil infrastructure. The goal of this Special Issue is to provide a platform for scientists worldwide to promote, share, and discuss various new issues and developments in the area of **fiber reinforced materials**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **fiber reinforced materials**. Potential topics include, but are not limited to:

- Carbon fiber reinforced polymer (CFRP)
- Glass fiber reinforced polymer (GFRP)
- Aramid fiber reinforced polymer (AFRP)
- Materials and manufacturing
- Properties of FRP reinforcements
- Developments and applications

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Fiber Reinforced Materials**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	December 15th, 2016
Publication Date	February 2017
