

Special Issue on Construction and Building Materials

Call for Papers

The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in area of construction and building materials. The materials and technology covered include: cement, concrete reinforcement, bricks and mortars, additives, corrosion technology, ceramics, timber, steel, polymers, glass fibres, recycled materials and by-products, sealants, adhesives.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Construction and Building Materials**. Potential topics include, but are not limited to:

- Sustainability of construction and building materials
- Biodeterioration of construction and building materials
- Concrete technology
- Properties, modeling and testing of construction and building materials
- Nanotechnology in construction and building materials
- Modification of construction and building materials
- Types of construction and building materials
- Repair materials and strengthening methods
- Thermal protection, moisture protection and corrosion protection

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Construction and Building Materials**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	April 28th, 2017
Publication Date	June 2017
