

## Special Issue Composites and Polymers

### Call for Papers

Polymers and composites impact every aspect of our lives, underpinning our built environment, energy systems, healthcare and consumer goods industries. Our research activities are equally diverse and include bio-inspired morphing composites, 3D printable polymers, self-healing and stimuli-responsive polymers, recyclable and biodegradable plastics, fibres and hydrogels for medical innovations and advanced polymers for sustainable energy generation. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Composites and Polymers**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Composites and Polymers**. In this special issue, potential topics include, but are not limited to:

- Molecular arrangement of polymers
- The structure of polymers
- Characteristics of polymers
- Friction and wear of polymer composites
- Fiber-reinforced polymer composites
- Polymer nanocomposites
- Polymer composites: Preparation, characterization, and application

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Composites and Polymers**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	February 12th, 2022
Publication Date	April 2022
