

## Special issue on Earth and Environmental Science:

### "Sustainability and conservation-Earth's ultimate goal"

#### Call for Papers

We intend to invite front-line researchers and authors to submit original research and review articles on exploring "Earth and Environmental Science" for this special issue. The goal will be to cover various topics in earth sciences and environmental sciences that has prime importance in saving the planet from extinction. To be precise, advanced applications of geosciences in geo-engineering, petroleum geology, exploration geology, carbon sequestration, environmental geology, etc. that can address sustainability issues concerning climate change, global warming, global energy crisis, etc. will be included. In brief, these are the following topics that will be covered, but are not limited to:

- Non-renewable energy sources
- Hydrocarbon exploration
- Coal extraction/coal mining
- Fossil fuel conservation
- Metal extraction from ore deposits
- Mineral deposits
- Global Energy crisis
- Global Warming and Climate Change
- Natural Disasters I: weather related (hurricanes, tornadoes, drought, etc.)
- Natural Disasters II: earth processes related (earthquakes, volcanoes, etc.)
- Environmental pollution
- Groundwater contamination
- Carbon sequestration
- Saving the ecosystem

Authors should read over the journal's [Author Guidelines](#) carefully before submission, Prospective authors should submit an electronic copy of their complete manuscript through the journal [Paper Submission System](#).

Please kindly notice that the "Special Issue" under your manuscript title is supposed to be specified and the research field "Earth and Environmental Science: 'Sustainability and conservation-Earth's ultimate goal'" should be chosen during your submission.

According to the following timetable:

Manuscript Due	December, 20th, 2012
Publication Date	February 2013

#### Editors-in-Chief

Prof. Kuo-Chen Chou,  
Gordon Life Science Institute, USA
