

## Special Issue on Natural Disasters

### Call for Papers

A **natural disaster** is a major adverse event resulting from natural processes of the Earth; examples include floods, volcanic eruptions, earthquakes, tsunamis, and other geologic processes. A natural disaster can cause loss of life or property damage, and typically leaves some economic damage in its wake, the severity of which depends on the affected population's resilience, or ability to recover. Recently, the natural disasters become more and more frequently, we should pay great attention to them.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **natural disasters**. In this special issue, potential topics include, but are not limited to:

- Volcanic eruptions
- Hydrological disasters
- Limnic eruptions
- Cyclonic storms
- Extratropical Cyclones
- Health disasters
- Space disasters

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission, Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the "Special Issue" under your manuscript title is supposed to be specified and the research field "**Special Issue- Natural Disasters**" should be chosen during your submission.

According to the following timetable:

Submission Deadline	December 29th, 2013
Publication Date	February 2014
