

Special Issue on Fishes

Call for Papers

Fishes are the oldest vertebrates which breathe through the gills and use the fins assist body balance and movement. They inhabit almost every aquatic environment on earth. Fishes are important resource for human beings, especially as food. As the experimental object in biomedicine, environmental protection and other research fields, it has helped people gain a lot of scientific achievements.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **fishes**. Potential topics include, but are not limited to:

- Freshwater fishes
- Marine fishes
- Fish growth
- Fish reproduction
- Fish genetics
- Fish parasites
- Fish habitat

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Fishes**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	June 12th, 2018
Publication Date	July 2018
