

Special Issue on Animal & Environmental Biology

Call for Papers

Animal science is concerned with the science and business of producing domestic livestock species. The livestock production and management has influences and relationship to the environment. Environmental biology studies origins, functions, relationships, interactions, and natural history of living species in relation to dynamic environmental processes.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Animal & Environmental Biology**. Potential topics include, but are not limited to:

- Animal environment and health
- Ecology and biodiversity
- Wildlife biology and conservation
- Animal biotechnology
- Sustainable animal production
- Animal hygiene and environmental health
- Animal agriculture and environmental impacts
- Animal toxicology
- Animal welfare
- Ecological impacts and animal behavior

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Animal & Environmental Biology**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	May 17th, 2021
Publication Date	July 2021
