

Special Issue on Animal Ecology and Conservation

Call for Papers

"Animal Ecology and Conservation" is an academic topic that focuses on the study of animals and their interactions with their environment, as well as the preservation and protection of biodiversity. It encompasses research on animal behavior, population dynamics, species distribution, habitat assessments, and the impacts of human activities on wildlife. This field aims to understand the ecological dynamics of animal populations and develop strategies for their conservation, including habitat management, species reintroduction, and mitigation of human-wildlife conflicts.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Animal Ecology and Conservation**. Potential topics include, but are not limited to:

- Behavioral ecology
- Animal ecology and biodiversity
- Community ecology
- Population ecology
- Conservation biology
- Conservation genetics
- Restoration ecology
- Toxicology
- Wildlife management and conservation
- Sustainable animal production
- Animal welfare
- Conservation policy and governance

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue – Animal Ecology and Conservation**" should be chosen during your submission.

According to the following timetable:

Submission Deadline	March 21st, 2024
Publication Date	May 2024

Scientific Research
Open Access

Open Journal of Animal Sciences

ISSN Online: 2161-7627
