**Open Journal of Apoptosis (OJApo)** is an open access journal published quarterly. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas of apoptosis.

## Subject Coverage

All manuscripts must be prepared in English, and are subject to a rigorous peer-review process. Accepted papers will immediately appear online followed by printed in hard copy. Topics to be covered by this journal include, but are not limited to:

- Apoptosis DNA fragmentation
- Apoptosis implication in ageing
- Apoptosis implication in AIDS
- Apoptosis implication in autoimmune disease
- Apoptosis implication in cancer
- Apoptosis implication in cardiovascular disease
- Apoptosis implication in neurodegenerative disorders
- Apoptosis implication in osteoporosis
- Apoptosis implication in viral infection
- Apoptosis in plants
- Apoptosis pathways
- Caspase independent apoptosis
- Defective apoptotic pathways
- Hyperactive apoptosis
- Inhibition of apoptosis
- Programmed cell death

We are also interested in: 1) Short reports—2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book reviews—Comments and critiques.

## Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.

## What is SCIRP?

Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science with its publication.

## What is Open Access?

All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, worldwide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
