

Special Issue on Coating Science and Technology

Call for Papers

The coating is a continuous film applied to the surface of an object and used for protecting or decorating the object. It may completely cover the substrate, or only cover parts of the substrate. Coatings are usually a kind of viscous liquid, based on resin, oil, or emulsion, and formulated with an organic solvent or water. In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **coating science and technology**. Potential topics include, but are not limited to:

- Coatings and synthetic chemistry
- Development of coating process and technology
- Functions and types of coatings
- Problems and solutions in coating application process
- National and international standard of coatings
- Application of analytical instrument in coating industry

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Coating Science and Technology**” should be selected during your submission.

According to the following timetable:

Submission Deadline	February 26th, 2016
Publication Date	April 2016
