## Special Issue on Medical Ultrasound

### Call for Papers

Medical ultrasound (also known as diagnostic sonography or ultrasonography) is a diagnostic imaging technique based on the application of ultrasound. It is used to see internal body structures such as tendons, muscles, joints, vessels and internal organs. Its aim is often to find a source of a disease or to exclude any pathology.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Medical Ultrasound**. Potential topics include, but are not limited to:

- Breast ultrasound
- Contrast-enhanced ultrasound
- Dermatology
- Echocardiography
- Elastography
- Emergency medicine
- Fetal echocardiography
- Gastrointestinal ultrasound
- General and abdominal ultrasound
- Genitourinary ultrasound
- Gynecologic ultrasound
- Head and neck ultrasound
- High frequency clinical and preclinical imaging
- Interventional-intraoperative ultrasound
- Musculoskeletal ultrasound
- Neurosonology
- Obstetric ultrasound
- Ophthalmologic ultrasound
- Pediatric ultrasound
- Point-of-care ultrasound
- Therapeutic ultrasound
- Ultrasound in global health
- Urologic ultrasound
- Vascular ultrasound

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Medical Ultrasound**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	February 8th, 2017
Publication Date	March 2017

**Guest Editor:**
