

Special Issue on Cement and Concrete Research

Call for Papers

Cement and Concrete Research focuses on the study of cement and concrete technology, which involves in materials science and engineering of cement, cement composites, mortars, concrete and other allied materials that incorporate cement or other mineral binders. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of cement and concrete.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Cement and Concrete Research**. Potential topics include, but are not limited to:

- Anti-corrosion measures
- Failure modes of steel reinforced concrete
- Pre-stressed concrete
- Steel plate construction
- Compressive strength of concrete
- Durability of concrete
- Cracked reinforced concrete
- Seismic performance of concrete

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Cement and Concrete Research**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	May 8th, 2024
Publication Date	July 2024
