

Special Issue on Research on Biodiversity

Call for Papers

“Biodiversity” is often defined as the variety of all forms of life, from genes to species, through to the broad scale of ecosystems. The number of species of plants, animals, and microorganisms, the enormous diversity of genes in these species, the different ecosystems on the planet, such as deserts, rainforests and coral reefs are all part of a biologically diverse Earth. It mainly includes Genetic diversity, Species diversity and Ecosystem diversity, among these three layers, Species diversity is the key part of biodiversity, it reflects the complicated relationship between organisms and environment, and also reflects the richness of biological resources. Since rational use of natural resources and the protection of the ecological environment is the foundation for human to achieve the sustainable development, the biodiversity research and conservation has becoming a hot topic worldwide.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **Research on Biodiversity**. Potential topics include, but are not limited to:

- Biodiversity Importance
- Loss of Biodiversity
- Protection and restoration techniques
- Index of biodiversity articles
- Measurement of biodiversity
- Threats to biodiversity

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Research on Biodiversity**” should be chosen during your submission.

According to the following timetable:

Manuscript Due	March 19th, 2014
Publication Date	May 2014

Guest Editor:

Dr. Rituparna Bose

The City University of New York, USA
