

Special Issue on Advances in Microbial Ecology

Call for Papers

Microbial Ecology is the ecology of microorganisms: their relationship with one another and with their environment. It concerns the three major domains of life—Eukaryota, Archaea, and Bacteria—as well as viruses.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **advances in microbial ecology**. Potential topics include, but are not limited to:

- Biodiversity
- Microbes evolution and creation
- Microbes & Bioremediation
- Microbes & Waste recycling
- Food microbiology
- Fuel production and biotechnology
- Microbial resource management

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Advances in Microbial Ecology**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	June 25th, 2015
Publication Date	August 2015
