

Special Issue on Landscape Ecology and Regional Planning

Call for Papers

Landscape ecology is the science of studying and improving relationships between ecological processes in the environment and particular ecosystems. This is done within a variety of landscape scales, development spatial patterns, and organizational levels of research and policy. The goal of this special issue is to provide a platform for scientists and academics all over the world to promote, share and discuss various new issues and developments in modern landscape ecology and regional planning.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **landscape ecology and regional planning**. In this special issue, potential topics include, but are not limited to:

- Relationships in ecological theory
- Landscape planning
- Landscape design
- Sustainable flood retention basins
- Integrated constructed wetlands
- Urban landscape
- Water-sensitive urban design
- Best management practice and sustainable drainage systems
- Important terms in landscape ecology
- Landscape ecology

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Landscape Ecology and Regional Planning**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	November 30th, 2016
Publication Date	January 2017
