

Special Issue on Ecosystem and Biodiversity Conservation

Call for Papers

Biodiversity is the assembly of ecological complexes formed by living things and their environment, and various related ecological processes, including animals, plants, microorganisms and the genes they possess, as well as the complex ecosystems they form within their living environment. It usually includes three components: genetic diversity, species diversity, and ecosystem diversity. The measures of biodiversity protection include local protection, ex-situ protection, establishment of gene bank and legal system. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Ecosystem and Biodiversity Conservation**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Ecosystem and Biodiversity Conservation**. Potential topics include, but are not limited to:

- Protection and restoration techniques
- Measurement of biodiversity
- Biodiversity and agriculture
- Ecological controls on biodiversity
- Biodiversity, business and industry
- Biodiversity and ecosystem function
- Biodiversity and climate change
- Threats to biodiversity

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Ecosystem and Biodiversity Conservation**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	August 25th, 2020
Publication Date	October 2020

Guest Editor:

Scientific Research
Open Access

**Open Journal
of Ecology**
ISSN Online: 2162-1993
