
Special Issue on Plant Ecology and Diversity

Call for Papers

Plant ecology is a subject that focuses on the relationship among different plants, and the relationship between plants and the environment. It studies the adaptability of plant individuals to different environments, the formation and development of plant populations and communities in different environments, and the impact of environment on plant individuals. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Plant Ecology and Diversity**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Plant Ecology and Diversity**. Potential topics include, but are not limited to:

- Biological interaction
- Ecological plant geography
- Species distribution
- Biodiversity protection and conservation
- Plant ecology and evolution
- Climate change and plant
- Plant reproduction and development
- Plant physiological ecology

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Plant Ecology and Diversity**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	November 16th, 2020
Publication Date	January 2021
