

Special Issue on Environmental Ecology and Ecological Effectiveness

Call for Papers

Ecological environment is a complex system related to the sustainable development of society and economy. Ecological benefit refers to the beneficial effects of natural biological systems on human production, living conditions and environmental conditions in accordance with the law of ecological balance in production. It is related to the fundamental and long-term interests of human survival and development. The basis of ecological benefits is the ecological balance, and the virtuous and efficient cycle of the ecosystem. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Environmental Ecology and Ecological Effectiveness**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Environmental Ecology and Ecological Effectiveness**. Potential topics include, but are not limited to:

- Economic efficiency and environmental effectiveness
- The ecological effects of pollution, disturbance, and other stresses
- Industrial ecology
- Environment planning, design and assessment
- Technological change and the environment
- Ecological modernization
- Ecological environment issues
- Eco-innovation

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Environmental Ecology and Ecological Effectiveness**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	October 24th, 2020
Publication Date	December 2020
