
Special Issue on Wetlands Ecology and Management

Call for Papers

Wetland ecosystem is a unified overall composition of wetland plants, animal microorganisms and their environment inhabiting wetlands, which has multiple functions: protect biodiversity, regulate runoff, improve water quality and regulate microclimate. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Wetlands Ecology and Management**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Wetlands Ecology and Management**. Potential topics include, but are not limited to:

- Wetlands and climate change
- Wetlands policy and ecological economics
- Wetlands biology
- Wetland products and productivity
- Wetlands and biodiversity
- Wetlands and water quality
- Hydrology
- Constructed wetlands
- Wetland pollution and control

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Wetlands Ecology and Management**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	June 29th, 2021
Publication Date	August 2021
