

Special Issue on Landscape Ecology

Call for Papers

Landscape ecology is the study of the pattern and process between temporal and spatial aspects of a landscape and the organisms within it, which could be affected by natural causes and human society. It is relevant to a range of ecological, geophysical, and social sciences. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of landscape ecology.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Landscape Ecology**. Potential topics include, but are not limited to:

- Tundra
- Topography
- Seascape
- Grasslands
- Woodlands
- Spatial patterns
- Spatial heterogeneity
- Land change modeling
- Landscape architecture
- Landscape structure and function
- Landscape conservation and sustainability

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Landscape Ecology**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	December 16th, 2021
Publication Date	February 2022
