## Special Issue on Terrestrial Ecosystem

### Call for Papers

Terrestrial ecosystems are the communities of organisms and the interactions of biotic and abiotic components on land. The type of terrestrial ecosystem in a particular place is dependent on the temperature range, the average amount of precipitation received, the soil type, and amount of light it receives. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of terrestrial ecosystem.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Terrestrial Ecosystem**. Potential topics include, but are not limited to:

- Birds
- Coleoptera
- Deserts
- Floodplain
- Grassland
- Insects
- Mammals
- Mountains
- Physical geography
- Prairie
- Rainforests
- Savanna
- Urban ecosystems
- Vegetation region
- Woodlands
- Deforestation and climate change

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Terrestrial Ecosystem**” should be selected during your submission.

Special Issue Timetable:

---

Submission Deadline	November 30th, 2022
Publication Date	January 2023

**Guest Editor:**
