

Special Issue on Ecology and Conservation

Call for Papers

Ecology and Conservation focuses on the ecological and conservation science that deals with the preservation and management of biodiversity and natural resources. It covers organismal, population, community, and ecosystem ecology; physiological, evolutionary, and behavioral ecology, and conservation science. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Ecology and Conservation.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Ecology and Conservation**. Potential topics include, but are not limited to:

- Biodiversity
- Habitat fragmentation
- Sustainable land use practices
- Wildlife conservation and management
- Endangered species protection
- Ecological restoration
- Invasive species management
- Conservation genetics
- Wildlife corridors
- Ecosystem services
- Ecological modeling
- Climate change impacts on ecosystems
- Ecological succession
- Landscape ecology
- Conservation policy and management

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Ecology and Conservation**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	March 15th, 2024
Publication Date	May 2024
