Special Issue on Geology and Resource Management

Call for Papers

Resources geography is a discipline that studies the geographical distribution, structural characteristics and rational development, utilization and protection of various resources. Its research is of great significance to the long-term estimation and strategic planning of resource development. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Geology and Resource Management.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Geology and Resource**Management. Potential topics include, but are not limited to:

- Marine geology
- Petroleum geology
- Coal deposits
- Metal deposits
- Oil and gas
- Fossil fuels
- Water resources
- Mineral resources
- Renewable energy resources
- Exploration operations
- Economic geology and natural resources
- Energy resource deposits
- Resource distribution
- Utilization and protection of natural resources
- Pollution studies related to exploration resources
- Metalliferous and non-metalliferous ore geology
- Ore and gangue mineralogy
- Specific deposits, districts, and belts

Authors should read over the journal's <u>For Authors</u> carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's <u>Paper Submission System</u>.

Please kindly specify the "Special Issue" under your manuscript title. The research field "Special Issue - Geology and Resource Management" should be selected during your submission.

ISSN Online: 2161-7589

Special Issue Timetable:

Submission Deadline	March 12th, 2024
Publication Date	May 2024
