

Special Issue on Mineralogy and Petrology

Call for Papers

Mineralogy is the study of the chemistry, crystal structure and physical properties of the minerals and mineralized artifacts. Petrology is the study of volcanic, plutonic and metamorphic rocks, and the processes that form and transform them. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Mineralogy and Petrology.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Mineralogy and Petrology**. Potential topics include, but are not limited to:

- Geosphere
- Granite
- Igneous rocks
- Limestone
- Magma
- Metamorphic rocks
- Meteorites
- Mineral deposits
- Mineral ecology
- Mineral evolution
- Ore
- Perovskites
- Petrography
- Plutonic rocks
- Rock formations
- Sandstone
- Sedimentary basin
- Sedimentary rocks
- Shale
- Volcanic rocks

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - *Mineralogy and Petrology***” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	April 18th, 2024
Publication Date	June 2024
