

Special Issue on Advances in Gastritis Research

Call for Papers

As one of the most important digestive organs in digestion system, stomach health means body health. **Gastritis** is an inflammation, irritation, or erosion of the lining of the stomach. It can occur suddenly (acute) or gradually (chronic). If gastritis is left untreated, it can lead to a severe loss in blood and may increase the risk of developing stomach cancer. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues in the area of **gastritis research**.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **advances in gastritis research**. Potential topics include, but are not limited to:

- Types of gastritis
- Causes and symptoms of gastritis
- Other gastrointestinal diseases affected by gastritis
- Damages to body function
- Diagnosis and treatment
- Disease prevention

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Advances in Gastritis Research**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	February 26th, 2015
Publication Date	April 2015
