

Special Issue on Gastrointestinal Surgery

Call for Papers

The digestive system is an intricate system that can be disrupted by disease, diet and emotional stress. Some digestive diseases can be cured with medicine and lifestyle changes, while others require surgery. The largest structure of the digestive system is the gastrointestinal (GI) tract, which can be divided into the upper GI tract and the lower GI tract. **Gastrointestinal Surgery** correspondingly can be divided into upper GI surgery and the lower GI surgery. The upper GI surgery refers to the surgery that focuses on the upper parts of the gastrointestinal tract, which includes the stomach, mouth, oesophagus and duodenum. The lower GI surgery includes colorectal surgery as well as surgery of the small intestine.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Gastrointestinal Surgery**. Potential topics include, but are not limited to:

- Bariatric surgery
- Colectomy
- Esophagectomy
- Laparoscopic surgery
- Liver resection
- Pancreaticoduodenectomy
- Proctosigmoidectomy
- Rectopexy

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Gastrointestinal Surgery**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	December 20th, 2016
Publication Date	February 2017
