

## Special Issue on Hepatic Disorders and Treatment

### Call for Papers

The liver is an organ with mainly metabolic functions in the body. It plays a role in deoxidation, storage of glycogen, and synthesis of secreted proteins in the body. Hepatic Disorder can be divided into viral liver disease and non-viral liver disease according to the pathogenesis. Food therapy can be used to treat hepatic disorder and support liver protection. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Hepatic Disorders and Treatment**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Hepatic Disorders and Treatment**. Potential topics include, but are not limited to:

- Treatment and prevention of hepatic disorders
- Chronic hepatic disorders
- Causes and symptoms of hepatic disorders
- Fatty liver
- Alcoholic liver disease
- Hepatic tumor
- Hepatitis and virus infection

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Hepatic Disorders and Treatment**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	October 26th, 2020
Publication Date	December 2020
